technical sheet

/ TC52

Safety rangers with insulated soles for live working (TST)

/ Standards

- EN ISO 20345:2011 : SB
- Heel energy absorption : None
- Pierce-resistance : P

/ Use

Tested according to HTA 70A index E (April 2012). Approved and tested by SERECT, used by EDF in France. Excellent ankle support thanks to the height of the upper, the inner padding, and the lacing.

/ Technical specifications

- **Shape** : Very high shoes
- **Available sizes** : 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48
- **Main color** : Brown
- **Weight EU (g per pair)** : 2400
- **Fastening** : Laces
- **Outsole material** : Rubber, Nitrile
- **Security toe cap material** : Steel
- **Toe cap energy absorption** : 200j
- **Lining material** : Leather
- **Upper finition** : Grain Leather
- **Upper material** : Leather
- **Benefits element** : Made in Europe
