B21LS
B Series Handheld Thermal Camera

HIKMICRO B21LS is designed for temperature measurement to find invisible faults. It's equipped with a 256 x 192 resolution thermal detector. The thermography ranges from -20°C to 550°C (-4°F to 1022°F). Which meets most situations. It helps the staff to quickly find the fault according to accurate temperature measurements of high-temperature targets in the environment. Meanwhile, it provides assistance decisions and ensures safety. The device is mainly applied to various industries, such as building, HVAC, and auto industry, etc.
